First-class treatment

Implementing a philosophy that encompasses complete relaxation and rejuvenation, Dr. Campbell leaves no stone unturned. Whether it be exemplified by a discreet, post-surgical back entrance connected to a private examination room, computer imaging or aromatherapy, Dr. Campbell's appreciation for comfort proves comprehensive. "I send facial rejuvenation patients flowers after treatment. It's the details that make us a caring practice." Likewise, all facelift patients receive Obagi® products prior to surgery and complimentary facial massages the day of treatment. "I take joy in making my patients smile." In particular, Dr. Campbell uses endoscopic techniques with minimal incisions to expedite healing, minimize bruising, and facilitate quick recoveries. Additionally, patients receive calls after surgery and take comfort in having the staff they interact with during consultations oversee their care in the operating room and post-surgically.
